

2017

UNITED STATES

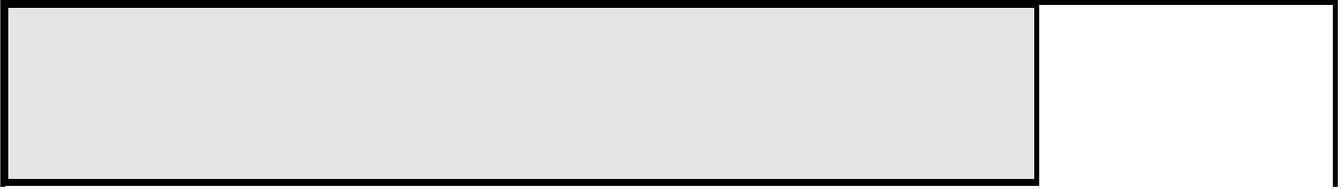

**III. BACKGROUND**

- A. Each Agreement State has the responsibility to promulgate LBR that satisfy the compatibility requirement of Section 274 of the Atomic Energy Act of 1954, as amended. States generally fulfill that responsibility through promulgation of regulations. Because each Agreement State possesses detailed knowledge of its own requirements

3. The State should submit r0 Tlations to the NRC at least 60 days prior to the date by which comments are needed by the State. Before a r0 ulation review can commence, all of the required information needs to be supplied to STP. The State, in its transmittal letter, is requested to: (1) identify the specific r0 Tlation sections that are being changed using line-in/line-out text or equivalent format; (2) identify which amendment(s) the State is submitting r0 Tlations to cover using the name ~~or~~ **and** RATS ID number. **Appendix A contains r0 Tlation submission guidance for NRC staff reviews.** (Sample transmittal letters are shown in Attachments 1 and 2 to ~~Appendix A~~ **can be found on the R0 Tlation Toolbox on the STP website**);

## APPENDI

Q How do I find out what regulations my State is expected to adopt to be found adequate and compatible for the upcoming IMPEP review?

A The State's SRS sheet contains the status of the State's submissions and NRC's review results. The SRS sheet is updated after the completion of each regulation package review conducted by NRC.

Q What does it mean if the SRS sheet has boxes not filled in?

A Blanks on the SRS sheet usually mean that the NRC staff has not received proposed or final regulations to review. If there is a blank and the State believes that the entry is an error, please contact th

review the State regulations to verify that the compatibility/health and safety requirements have been adopted.

Q What does a “non-applicable” status mean on the SRS sheet?
